Summary

Full-Stack and DevOps Engineer with 4+ years of production experience owning web applications and cloud infrastructure end-to-end. Ships tested, deployed products across Next.js/React, Go, and Python, backed by Docker, Terraform, Kubernetes, and GitHub Actions CI/CD. Scaled Linux production for 500+ concurrent users (60% fewer crashes, 40% faster responses) and architected a 14-service ERP/CRM platform.

Technical Skills

Languages: TypeScript, JavaScript, Python, Go, SQL, C#, Java, C++
Frontend: React, Next.js (App Router), Tailwind CSS, TanStack Query/Table, GraphQL, REST/WebSockets
Backend & Data: Go (Gin), Node.js, FastAPI, ASP.NET Core, gRPC, Protocol Buffers, sqlc, Prisma, PostgreSQL, Redis, MongoDB, NATS JetStream
Cloud & DevOps: AWS, Cloudflare (Workers, KV, R2), Terraform, Kubernetes (k8s/k3s), Helm, Docker, GitHub Actions CI/CD, Linux, Caddy
Testing & Observability: Vitest, Playwright, Chaos Testing, Prometheus, Grafana, Loki, Promtail

Experience

Backend & DevOps Engineer **Jan 2022 – Mar 2026**
Attila Gaming *United States (Remote)*

- Managed production Linux infrastructure and backend services for a real-time platform serving 500+ concurrent users, cutting server crashes by 60% and response latency by 40% under peak load; developed 15+ Java backend services.
- Built GitHub Actions CI/CD pipelines, Dockerized deployments, zero-downtime backup recovery, and Prometheus/Grafana/Loki observability across multi-node Linux hosts.

Backend & Cloud Architect (Contract) **Sep 2025 – Nov 2025**
Ayist Group *Poland (Remote)*

- Designed the architecture for a 14-service ERP, CRM, and Document Management platform; defined Protocol Buffers/API schemas, auth flows, and retry policies across a 6-person Go, Python, and React team.
- Built the Terraform and Helm pipeline for Kubernetes on Hetzner Cloud, enabling one-command environment provisioning.

Projects

Nexus Commerce – Multi-Tenant E-Commerce | *Go, Next.js, Cloudflare Workers* github.com/Omar0Gamal/Nexus-Commerce

- Built a Go 1.24 modular monolith (25 domain modules, `sqlc/pgx`) with a merchant admin console and Next.js storefront; Cloudflare Worker + KV resolves custom domains to tenants and injects a shared-secret header verified by Caddy.
- Implemented Redis carts, 15-minute inventory reservation locks, and an LPUSH/BRPOP job queue (email, webhooks, invoices); integrated Paymob payments, Cash on Delivery, and R2 media.

JobTrack – Job Application Tracker | *Next.js, TypeScript, Prisma, PostgreSQL* github.com/Omar0Gamal/JobTrack

- Shipped a deployed full-stack app with OAuth-gated personal mode and a zero-signup demo using signed guest sessions; features Kanban drag-and-drop, URL-synced filters, and funnel analytics. Live demo: jobtrack-demo.vercel.app.
- Hardened URL autofill against SSRF; covered by 207 Vitest tests, 5 Playwright E2E tests, and GitHub Actions CI.

Cartwright – Distributed Checkout System | *Go, C#, Python, gRPC, NATS, k8s, Terraform* github.com/Omar0Gamal/cartwright-saga

- Built a Go Saga orchestrator with ASP.NET billing and Python notification services over gRPC/NATS JetStream; idempotency keys, transactional outbox, and chaos testing guarantee zero double-charges; deployed to k3s via Terraform and Helm.

AxiomGraph – Hybrid Search API | *Python, C++17, CUDA, SQLite* github.com/Omar0Gamal/AxiomGraph

- Built a GraphRAG search engine and HTTP API with a Python SDK (`nanobind`) and CI wheel builds, reaching 8,600 QPS on CPU and 33,000+ QPS on GPU across 1M nodes.

Education

Capital University **Cairo, Egypt**
B.Sc. in Computer Science | GPA: 3.92 / 4.0 (Dean's List)
